

# Talha Sadiq

## AI-Powered Full Stack Developer | Mobile, Web & LLM Engineering

shtalhagaba@gmail.com | +92 345 6601101 | linkedin.com/in/talhagaba | github.com/shtalhagaba | behance.com/shtalhagaba

### PROFESSIONAL SUMMARY

Full Stack Developer with 8 years of production experience in React Native, Node.js, and React, now expanding into AI engineering and automation. Hands-on with Claude Code, Cursor AI, OpenAI API, TensorFlow, and Model Context Protocol (MCP) integrations for AI-assisted development and on-device inference. Background spans REST API architecture, microservices, and cloud deployment across AWS, Azure, and Firebase, with a focus on LLM applications, AI agents, and workflow automation for production systems.

### AI & AUTOMATION SKILLS

**Hands-on Experience:** Claude Code, Cursor AI, OpenAI API, Gemini API, MCP (Model Context Protocol) integrations, TensorFlow, ONNX Runtime, n8n, GitHub Actions, FastAPI, prompt engineering, AI-assisted code generation, AI debugging, AI code review, AI workflow automation

**Currently Learning:** Anthropic Claude API, LangChain, LangGraph, CrewAI, Retrieval-Augmented Generation (RAG), vector databases, Ollama, Hugging Face, PyTorch, Make, Zapier, Supabase, Docker (containerized deployment)

### TECHNICAL SKILLS

**Full Stack Development:** Node.js, Express, FastAPI, Python (Django, FastAPI), Ruby on Rails, Laravel, React, Next.js, TypeScript, JavaScript, GraphQL, REST APIs, microservices

**Mobile Development:** React Native (CLI, Expo), Android (Java, Kotlin), Swift, Redux (Toolkit, Saga, Thunk, Persist), React Hooks, localization

**Databases & Cloud:** MongoDB, Firebase, Realm, SQLite, AWS (CDK, SDK, Cognito), Azure, Docker

**DevOps & Tools:** Git, GitHub (Actions, GitLab, Bitbucket workflows), CI/CD, Fastlane, Postman, Xcode, Android Studio

**Payments & Real-Time:** Stripe, Twilio, Agora, Socket.IO, WebRTC, Web3, blockchain, cryptography

### EXPERIENCE

#### Excersys (USA Based) *Full Stack Developer, Full Time*

Jan 2023 – Present

- Build and maintain production React Native and Node.js applications across fintech, food-tech, and sports-tech products, serving live users on iOS, Android, and web.
- Use Claude Code, Cursor AI, and MCP integrations in daily development for AI-assisted code generation, debugging, and code review, cutting feature turnaround time.
- Develop a real-time AI mobile platform with OpenAI integration and ONNX Runtime on-device inference for wearable devices, tuning performance on constrained hardware.
- Design REST API and microservices architecture across Node.js, Ruby on Rails, and Python (Django, FastAPI) backends, deployed on AWS, Azure, and Firebase.

#### Katch (Kuwait Based) *Full Stack Developer, Full Time*

Apr 2022 – Dec 2022

- Delivered food delivery platform features in React Native, Node.js, and React, with MongoDB, GraphQL, Socket.IO, and Redux Toolkit powering real-time orders and chat.

#### Naseeb Networks (Rozee.pk) *Senior React Native Developer, Full Time*

Nov 2020 – Mar 2022

- Led development of Dukan.pk (team of 10), Log.Fish, Deenee, and Ailaa, covering payments, real-time notifications, and offline-first architecture with Realm and Firebase.

#### Digital Tech *React Native Developer, Full Time*

Sep 2019 – Oct 2020

- Developed cross-platform mobile applications in React Native and contributed to architecture decisions and code review.

#### Quaid Ventures *Android Application Developer, Full Time*

Sep 2018 – Aug 2019

- Built native Android applications for POS and e-commerce products, including Zash Go and Qareeb Online Store.

### KEY PROJECTS

#### Kafy Supplier — B2B Food-Tech Supply Chain Platform (Excersys) | kafy.co

AI-assisted build of a food-tech supply chain platform for restaurants, cafes, and suppliers in Qatar. Combined React Native, Node.js, and React front ends with Ruby on Rails, Django, and FastAPI microservices on Azure. Used Claude Code, Cursor AI, and MCP integrations through the development workflow for faster iteration and code review.

#### Real-Time AI Mobile Platform — Wearables (NDA, Excersys)

Real-time mobile solution for wearable devices with audio and video streaming, voice-first interaction, and AI-driven features, using OpenAI integration, ONNX Runtime on-device inference, and WebRTC. Built in Swift and Kotlin with Bluetooth LE connectivity, shipped through CI/CD pipelines with Fastlane. Links restricted under NDA.

#### Liquidus — Crypto Wallet Platform (Excersys) | liquidus.finance

Secure crypto wallet enabling instant interest earning while keeping full user control of private keys. Built with React Native, Node.js, React, Web3, and encryption, deployed through CI/CD pipelines.

#### **WatchSports — Sports Event Search & Streaming Guide (Excersys) | [watchsports.app](#)**

Sports event discovery and connect-to-watch platform spanning professional, college, and esports events. Built with React Native, Node.js, GraphQL, AWS Cognito, and TensorFlow for recommendation features.

#### **Dukan.pk — Digitizing Sellers (Roze.pk, led a team of 10) | [dukan.pk](#)**

Web-store platform letting Pakistani businesses launch an online store in under 30 seconds. Built with React Native, Realm, Firebase, Rabbit MQTT, and payment and delivery integrations.

### **ADDITIONAL SELECTED PROJECTS**

---

Log.Fish (React Native, GraphQL, NOAA data integration – [log.fish](#)) • Deenee (React Native, Islamic education for children – [deeneeapp.com](#)) • Ailaaj (React Native, Agora video calls, e-pharmacy – [ailaaj.com](#)) • Sensights (React Native, Bluetooth device monitoring, telehealth – [markitech.ca](#))  
GreatWeek (React Native, business banking and invoicing – [greatweek.com](#)) • Wesrom Corporation (React Native, retail marketplace – [wesrom.com](#))  
• Chapman University App (React Native, campus services) • Feedni Seekers & Providers (React Native, marketplace)  
RTN2 (React Native, return logistics, Stripe integration) • My Fit Spot (React Native, fitness tracking) • Zash Go (Android, POS system) • Qareeb Online Store (Android, e-commerce)

### **EDUCATION**

---

Bachelor in Computer Science — University of Central Punjab, 2018 (CGPA 3.20)

Coursework: Data Structures, Object-Oriented Programming, Database Management Systems, Web Development, Software Engineering, Artificial Intelligence, Mobile App Development

Final Year Project: My Discussion Room, a real-time collaborative document platform built with WebRTC, ASP.NET MVC, and SQL Server

### **AWARDS & HONORS**

---

- First Prize, eRozgaar Hackathon 2019, as Team Lead
- Second Position, NASA Space Apps Challenge, as Team Lead
- ASO and Unity 3D workshops, with delivered projects following each
